# ABOUT PBR™

Power Bubble Rinse is a dedicated cleaning device for cleaning particles inside fine holes. Particles inside of the holes cannot be removed with general immersion cleaning, which causes a large number of particles to be generated when the chamber is installed. By using DI Water Bubble, particles can be effectively removed regardless of deformation, etching, or size change inside the hole.

## BENEFIT

Particle Inside of the Holes Improved by  
Compared to usual Cleaning **81%**

## APPLICATION

**PBR™ Can clean any parts with holes**
